

**BAA 05-01-PKTA
Amendment 03**

The following proposal instructions are added to BAA 05-01-PKTA, Section C, General Instructions, Note 3-Proposal Layout, Paragraph a.(4)-Current Capabilities, Page 24.

The technology development efforts to be conducted by any contract awarded through this BAA will be conducted under the guidance of the Integrated High Payoff Rocket Propulsion Technology (IHRPT) program and the Technology for the Sustainment of Strategic Systems (TSSS) program. Although not mandatory, it is highly recommended that a prospective offeror either have or develop a Government coordinated Advance Rocket Propulsion Plan (ARPP) prior to proposal submittal, or have a documented working relationship with a company possessing a government coordinated ARPP to ensure IHRPT and TSSS relevance of any proposed technology. **Due to this offerors should identify if they have either a government coordinated Advance Rocket Propulsion Plan (ARPP) or demonstrate that they have a documented working relationship with a company possessing a government coordinated ARPP in their proposal.** Government coordination on any ARPP being developed must be completed prior to proposal submittal.

The following evaluation criteria are added to BAA 05-01-PKTA, Section D-Proposal Evaluation, Paragraph 1b.-Technical Evaluation Criteria-Current Capability, Page 26.

In addition, the lack of a Government coordinated Advance Rocket Propulsion Plan (ARPP) or lack of demonstration that a documented working relationship with a company possessing a Government coordinated ARPP has been established will be negatively considered in determining Current Capability.
